DESCRIPTORS	*Census Figures; *Educational Finance; *Educational Trends; Elementary Secondary Education; *School District Spending; School Support; School Taxes; Statistical Analysis; *Tables (Data)

ABSTRACT

This report deals with the finances of about 15,800 school districts that exist as separate units of local government. It presents data on revenue, expenditures, indebtedness and debt transactions, cash and security holdings, district size, and recent trends. Data are presented on a State by State basis with information for areas within standard metropolitan statistical areas shown separately. Summary financial amounts also appear for school districts that reported an enrollment of 3,000 or more pupils in October 1971. The financial statistics reported are based mainly on information received in response to a mail canvass covering all school districts in the United States. The data collected indicate that school district government in the United States received $39.3 billion in revenue and made expenditures totaling $39.1 billion during the fiscal year 1971-72. They issued $2.1 billion and paid off $1.5 billion in long-term debt. At the end of the fiscal year, their total indebtedness amounted to $25.3 billion. Revenue of school districts was 73 percent greater in fiscal 1971-72 than in 1966-67. More than half of all school district expenditures are for salaries and wages. These expenditures totaled $26.1 billion in fiscal 1971-72, or 75 percent more than 5 years earlier. (Author/DN)

Preface

Finances of School Districts is one of several publications comprising Volume 4, Government Finances, of the 1972 Census of Governments.

The periodic census of governments is taken at 5-year intervals as required by law under Title 13, United States Code, Section 161. This 1972 quinquennial census, similar to those taken since 1957, covers four major subject fields–governmental organization, taxable property values, public employment, and government finances.

Plans and specifications for this census were developed by the Governments Division in consultation with other offices and divisions of the Bureau, other Federal Government agencies, and the Census Advisory Committee on State and Local Government Statistics. **David P. McNelis**, former Chief of the Governments Division, played an important part in development of plans for the 1972 Census of Governments.

This report was prepared in the Governments Division by the Finance Branch, headed by **Vance Kane**, under the supervision of **Maurice Criz**, Assistant Chief for Economic Statistics. Data review was conducted by **Patricia Mitchell**.

Data processing was planned by **Sherman Landau**, Assistant Division Chief for Research and Methodology. Computer operations were under the direction of **Geneva A. Hines** and were carried out by the Computer Services Division.

The finance data were assembled by the Eastern Sector Branch headed by **Charles Meyer** and the Western Sector Branch directed by **Richard J. Neach**, under supervision of **John Coleman**, Assistant Division Chief for Survey Operations.

The Publications Services Division, Social and Economic Statistics Administration, provided advice and service in the preparation of copy for publication. Publication copy was prepared in the Governments Division under the supervision of **Helen D. Files**.

Grateful acknowledgment is made of the cooperation given by the many State and local officials who provided information necessary for this phase of the 1972 Census of Governments.

Introduction

BEST COPY AVAILABLE

This report deals with the finances of about 15,800 school districts which exist as separate units of local government for the purpose of providing public schools. Expenditure and indebtedness of other types of governments for school purposes are not shown here, but will appear in other publications on governmental finances from the 1972 Census of Governments.

The classification pattern applied to school district finances is governed by the need to fit this segment into the comprehensive statistics on finances of all governments in the Nation that are being assembled in the 1972 Census of Governments. Accordingly, these statistics do not directly parallel or represent a substitute for the data on public school finances that are developed by the respective State offices of education and by the U.S. Office of Education. Reports of those agencies commonly reflect a far more detailed pattern of classification than that applied to school districts in Bureau of the Census reports on governments; and their figures are intended to cover all public school systems rather than only those which are independent local governments, as here reported.

School district governments in the United States received $39.3 billion in revenue and made expenditures totaling $39.1 billion during the fiscal year 1971-72. They issued $2.1 billion and paid off $1.5 billion in long-term debt. At the end of the fiscal year, their total indebtedness amounted to $25.3 billion.

These amounts relate to a major portion, but not the whole, of public school finances in the United States. Throughout five States and in some areas of a number of others, public education is provided by school systems that operate as agencies of other governments--county, municipality, township, or State--or (in the case of Pennsylvania a few "joint schools") as agencies of groups of school district governments. Such "dependent" school systems altogether enrolled about 9.1 million pupils in October 1971 or 19 percent of the total public school enrollment in the Nation.[1]

The following figures summarize, by type of system, the nationwide distribution of public school systems, schools, and enrollment in 1972:

Type of public school system	Public school systems	Public schools	Public school enrollment[1] (1,000)
	Number		
All public school systems	17,238	87,393	48,010
Independent school districts	15,781	72,757	38,935
Other school systems	1,457	14,636	9,076
State	3	367	201
County	508	5,960	3,384
Municipal	300	5,719	4,290
Township (and "town")	643	2,572	1,193
Other (Pennsylvania "joint schools")	3	18	8
	Percent		
All public school systems	100.0	100.0	100.0
Independent school districts	91.5	83.3	81.1
Other school systems	8.5	16.7	18.9
State	(2)	0.4	0.4
County	2.9	6.8	7.0
Municipal	1.7	6.5	8.9
Township (and "town")	3.7	2.9	2.5
Other (Pennsylvania "joint schools")	(2)	(2)	(2)

[1] Enrollment as of October 1971; includes 1,832,000 students enrolled in college-grade classes.

[2] Less than 0.05 percent.

The 15,781 school districts recorded for 1972 reflect a continuation of the marked decline that has taken place in the number of school districts over the past 30 years, primarily as a result of school district consolidation and reorganization. As can be noted from the following tabulation, the present number of school districts is less than three-fourths of the 1967 total, less than one-half of the total 10 years ago, and only slightly over one-eighth of the 1942 total:

School year	Number of school districts
1971-72	15,781
1966-67	21,782
1961-62	34,678
1956-57	50,454
1951-52	67,355
1941-42	108,579

---

[1] Extensive data concerning number and characteristics of school districts and dependent public school systems appear in the 1972 Census of Governments, Volume 1: Governmental Organization.

BEST COPY AVAILABLE

Although there has been a substantial decline in the number of school districts, the following four States each had more than 1,000 school districts in the 1971-72 school year:

State	Number of school districts
California	1,132
Illinois	1,177
Nebraska	1,374
Texas	1,174

These four States account for nearly one-third of all school districts in the Nation. The number of States having at least 1,000 school districts has decreased from 25 in 1942, 20 in 1952, 15 in 1962, 6 in 1967, to 4 in 1972.

The 1971-72 data shown here are based on information obtained from substantially all school district governments in the United States. As more fully explained below under "Sources of Data and Survey Procedure," the figures were gathered mainly by mail questionnaire.

The statistics reported for 1971-72 pertain to school district fiscal years that ended June 30, 1972 or at some date within the previous 12 months, subject to certain exceptions.[2]

RECENT TRENDS

Revenue of school districts, as table 1 shows, was 73 percent greater in fiscal 1971-72 than in fiscal 1966-67, having increased at an average annual rate of 11.5 percent during this 5-year period. All major components of school district revenue contributed to this trend. School district tax revenue (almost entirely property taxes) rose at an annual rate averaging 11.8 percent, from about $10.8 billion in 1966-67 to $18.8 billion in 1971-72. Intergovernmental revenue of school districts, mainly made up of grants and shared revenue from the States, increased at an average annual rate of 12.0 percent, from about $10.1 billion in 1967 to nearly $17.7 billion in 1971-72. Amounts received from other sources also increased during this 5-year period, but nationwide such sources continued to represent only a very minor portion of all school district revenue.

More than half of all expenditure of school districts is for salaries and wages--mainly payments to teachers, but also comprising amounts paid to supervisory, maintenance, and other employees, including bus drivers and other auxiliary personnel. Payroll expenditure of school districts totaled $26.1 billion in fiscal 1971-72, or 75 percent more than 5 years earlier. This reflects both an increase in the number of persons employed and the upward adjustment of school district pay rates during recent years, in response to higher prices and living costs. Census Bureau surveys of governmental employment indicate that school district employment (on a full-time equivalent basis) rose 14 percent between October 1966 and October 1971, and that the average monthly pay for full-time employees of school districts went up during this period by 40 percent, from $543 in October 1966 to $761 in October of 1971. Other current operation costs of school districts increased from about $4.5 billion in 1966-67 to $8.1 billion in in 1971-72. About 9 percent of all expenditure of school districts in 1971-72 was for capital outlay--mainly construction, but including also the purchase of equipment and of land and existing structures. Expenditure for construction outlay was 7 percent more in fiscal 1971-72 than 5 years before, in fiscal 1966-67.

School district payments of interest on their indebtedness show a considerable increase from $619 million in 1966-67 to $1.1 billion in 1971-72. This reflects the upward trends in interest rates and in school district debt. As shown in table 1, the total debt outstanding rose from $18.9 billion at the close of the 1966-67 fiscal year to $25.3 billion at the end of fiscal 1971-72.

Financial assets of school districts--i.e., their cash and security holdings--increased during the 5-year period at an average annual rate of 6.4 percent, to a 1971-72 aggregate of $9.3 billion.

REVENUE

Of school district revenue totaling $39.3 billion in fiscal 1971-72 all but the $108 million that is shown in table 1 for employee-retirement sources represents school district "general revenue"--i.e., $39.2 billion.

In the Census Bureau's classification of financial statistics for local governments, certain special kinds of revenue--namely, gross receipts of publicly operated utilities and liquor stores and the employee contributions and investment earnings received by employee-retirement systems--are reported separately from the broad predominant class, "general revenue." Since school districts do not operate utilities or liquor stores, only the employee-retirement category applies to them. Furthermore, retirement provision for teachers and other employees of school districts is made principally through systems administered by State governments rather than by individual school districts. Therefore, amounts of "employee-retirement revenue" and "employee-retirement expenditure" of school districts are shown here only in table 1, as summary national totals.[3]

---

[2] School districts in Alabama and Texas have fiscal years ending in September and August, respectively; however, they are treated as though they were part of the June 30 group.

[3] In table 7 State-by-State figures are shown on the cash and security holdings of employee-retirement systems administered by certain major school districts in 11 States. The 15 school districts involved are those of Denver, Colo.; Fulton County, Ga.; Chicago, Ill.; Des Moines, Iowa; Kansas City, and Wichita, Kans.; Detroit, Mich.; Duluth, Minneapolis, and St. Paul, Minn.; Kansas City, and St. Louis, Mo.; Omaha, Nebr.; Portland, Oreg.; and Milwaukee, Wis. Statistics concerning each of these retirement systems appear in table 8 of the report Employee-Retirement Systems of State and Local Governments (1972 Census of Governments, Vol. 6, No. 1).

BEST COPY AVAILABLE

Property taxes imposed by school districts supplied nearly half of all their general revenue in 1971-72. Intergovernmental revenue received from the States supplied most of the balance, or 42 percent of all general revenue. Miscellaneous nontax revenue sources of the school districts themselves provided 6.7 percent, and the remainder came from other local governments (1.1 percent), direct Federal grants (1.9 percent), and nonproperty taxes of school districts (0.9 percent). These proportions differ sharply from State to State, as is evident from the data presented in tables 3 and 5. The distribution of general revenue is shown in the table below:

Item	Amount (millions of dollars)	Percent
General revenue, total......	39,201	100.0
Intergovernmental revenue, total..	17,747	45.3
From Federal Government........	749	1.9
From State governments..........	16,568	42.3
From other local governments....	130	1.1
Taxes, total..........................	18,842	48.1
Property..............................	18,475	47.1
Other..................................	367	0.9
Charges and miscellaneous general revenue, total..................	2,612	6.7
Current charges................	2,029	5.2
Sale of property...............	34	0.1
Interest earnings..............	338	0.9
Other and unallocable..........	211	0.5

The various revenue classes shown in table 3 are in large part self-explanatory. Following, however, is a brief description of the contents and coverage of certain categories.

Intergovernmental revenue. Federal Government amounts shown under this heading relate only to direct Federal payments to school districts, and mainly concern grants to school districts in Federally impacted areas for construction or for school operation and maintenance. Amounts of money that the States receive from the Federal Government and distribute to school districts (for example, most Federal grant programs for elementary and secondary education, school lunches, and vocational education) are reported here as part of school district intergovernmental revenue from the States. Such amounts have risen sharply in recent years. However, they represent only a modest share of all State payments to school districts.

Most of the sums reported as school district revenue from other local governments involve the distribution or sharing of certain county taxes--in most instances a distinctive property tax levy for this purpose.

Taxes. Amounts shown under this heading in table 3 are limited to revenue from taxes imposed by school districts and collected by them or on their behalf by other local governments. Any school district share of taxes collected and distributed by the State government, or of taxes imposed by other local governments, is reported as intergovernmental revenue rather than as school district tax revenue.

In only a few States, as indicated by table 3, do school districts impose significant amounts of taxes other than property taxes. The amounts involved generally are relatively small except for Louisiana, where many school districts impose a general sales tax, and Pennsylvania, where numerous school districts rely heavily on one or more of various kinds of nonproperty taxes.

Charges and miscellaneous general revenue. Revenue from current charges, as shown in table 3, includes gross receipts from school districts' cafeteria and school lunch operations, as well as any receipts from tuition and other fees or charges applicable to pupils or their families. However, any amounts received by individual school districts from other districts for tuiton and transportation of nonresident pupils are excluded entirely, to avoid duplication in arriving at aggregates covering all school districts. Amounts reported in table 3 for "interest earnings" do not include earnings on investments of the employee-retirement systems that are administered by a few major school districts as described above.

EXPENDITURE

The $39.1 billion expended by school districts in fiscal 1971-1972 included $90 million of employee-retirement expenditure by a few district-administered systems (listed in footnote 3, above). The balance, consisting of general expenditure, was distributed as follows:

Item	Amount (millions of dollars)	Percent
Total general expenditure..	38,971	100.0
Other than capital outlay........	35,517	91.1
Personal services..............	26,071	66.9
Interest on debt...............	1,056	2.7
Other..........................	8,390	21.5
Capital outlay..................	3,454	8.9
Construction..................	2,605	6.7
Equipment.....................	697	1.8
Land and existing structures...	153	0.4

Table 4 presents such expenditure amounts on a State-by-State basis. Related percentage figures appear in table 5.

The table below shows, for school districts in each of 35 States, the average per pupil amount of total general expenditure and of all current general expenditure (i.e., excluding capital outlay). Omitted from this table, and also from the accompanying charts that pertain to school districts in 35 selected States, are not only the five States which entirely lack school district governments but also 10 other States where those school systems that operate as dependent agencies of other types of governments account for a significant fraction of all public school enrollment in the State. Further information concerning school districts covered in this report is given below, under "Reliability and Limitations of Data."

Washington	1,023	12	940	9
West Virginia	801	26	744	26
Wyoming	1,074	6	994	5

X Not applicable.

This tabulation indicates that total general expenditure of school districts of the 35 States involved ranged, in 1971-72, from an average of $590 per pupil in Alabama to $1,219 per pupil in Minnesota. For the middle one-third of these 35 States, the per-pupil average of total general expenditure ranged from $849 in Ohio to $1,009 in Florida.

When the comparison excludes capital outlay and takes account only of current general expenditure a range appears from $534 per pupil in Alabama to $1,082 per pupil in Minnesota with the middle one-third of these 35 States averaging between $768 and $883 per pupil.

The nature of most of the classes of expenditure shown separately in table 4 is apparent from their designation and placement. Following is further information regarding certain categories.

Expenditure other than capital outlay. Amounts reported under this heading are intended to include, without any deduction of related receipts (such as those from school lunch sales, reported on a gross basis in table 3), all payments for current school district activities, including administration and supervision, instruction, plant maintenance, transportation of pupils, and the provision of cafeteria services and any other auxiliary services. Payments to other school districts are excluded, however, to avoid duplication in arriving at aggregates covering all school districts. Amounts for personal services represent gross sums, without deduction of amounts withheld for taxes or employee contributions to retirement systems or social insurance.

Capital outlay. The equipment category covers not only expenditure for additional equipment but also for replacements. It is likely, however, that in figures submitted to the Bureau of the Census, some replacement amounts have been included with data for current operation expenditure. If this is so, amounts shown here involve some understatement of equipment expenditure, as defined, and thereby of total capital outlay. Amounts for equipment acquired under construction contracts, and as appurtenances of existing structures purchased by school districts, fall respectively within the categories "Construction" and "Land and existing structures."

General expenditure for college grades. During the school year 1971-72 there were 567 school districts providing education at the college level--i.e., above grade 12. These units were asked to report (on an actual or estimated basis) amounts of expenditure for this purpose. The results of this inquiry are summarized separately in table 4.

Intergovernmental expenditure. Total expenditure of school districts reported herein for Indiana and Pennsylvania includes some amounts classed as intergovernmental expenditure (as indicated by footnote 2 of table 4). In each instance, these transactions involve, in substance, rental payments for school facilities constructed and made available by other units of government--in Indiana, "school building corporations" which are classed as special districts, and in Pennsylvania municipal building authorities (also classed as special districts) or the State's school building authority.

Payments between school districts are excluded from the expenditure amounts shown in table 4, to avoid double counting. However, no deduction or special classification has been applied with respect to school district payments, as employers, to State-administered employee-retirement systems and to the Federal system of Old Age, Survivors, Disability, and Health Insurance.

INDEBTEDNESS AND DEBT TRANSACTIONS

At the end of their respective 1971-72 fiscal years, school district governments in the United States had total outstanding debt of $25.3 billion. Nearly all of this sum represented long-term debt--$24.1 billion; short-term indebtedness of school districts amounted to only $1.2 billion.

Financial assets held by school districts specifically for future retirement of long-term debt amounted to $868 million. By deduction of this amount from the gross long-term amount, $23.2 billion of net long-term indebtedness at the end of fiscal 1971-72 is indicated.

These school district amounts make up a major part but not all governmental debt for public school purposes. Other types of governments that operate local public schools in certain States, as indicated above, have also issued debt specifically for this purpose, and in a few States indebtedness for financing of local school construction has been incurred by counties, municipalities, or the State government, even though the actual operation of local schools rests with school districts. Subsequent reports of the 1972 Census of Governments on governmental finances will provide data on school debt of counties and municipalities.

During fiscal 1971-72, school districts issued $2.1 billion of long-term indebtedness and retired $1.5 billion of such debt previously incurred. Taking account also of an increase in short-term debt, total indebtedness of school districts rose during the fiscal year 1971-72 by $279 million, or 1.1 percent.

Table 6 presents data on a State-by-State basis concerning school district indebtedness and debt transactions. Included in table 6 are any amounts involving formal interest-bearing loans by State governments to school districts. However, where State loans are made which are repayable only on a contingent basis (as in California), the net advances or net repayments during the fiscal period are classed for Census Bureau reporting as intergovernmental revenue or expenditure.

CASH AND SECURITY HOLDINGS

As shown by State in Table 7, school district governments had financial assets at the end of fiscal 1971-72 amounting to $9.3 billion. The distribution of this aggregate by purpose of holding was as follows:

Item	Cash and security holdings	
	Amount (millions of dollars)	Percent
Total	9,305	100.0
Employee-retirement systems	949	10.2
Offsets to debt	868	9.3
Bond funds	2,178	23.4
All other	5,310	57.1

The financial holdings of school districts in funds other than employee-retirement funds amounted to $8.4 billion, divided among various types of holdings as indicated below:

Item	Cash and security holdings	
	Amount (millions of dollars)	Percent
Total	8,356	100.0
Cash and deposits	6,707	80.3
Securities:		
Federal Government	1,371	16.4
State and local governments	73	0.9
Other	205	2.4

SIZE GROUPS OF SCHOOL DISTRICTS

The enumeration of school districts that was made for the census of governments late in calendar 1971 identified nearly 15,800 such units in existence, including 308 districts that were not operating schools but, instead, arranged for education of any local resident pupils by other districts. Including such nonoperating units, there were 3,288 school districts in the United States which individually enrolled fewer than 150 pupils each. These units represented one-fifth of all school districts, but pupils enrolled in their schools numbered only about 160,000 as of October 1971, or less than 1 percent of the total enrollment of all school districts. At the other extreme, there were over 22 million pupils, or more than half of all school district enrollment, in the 1,274 districts that had 6,000 or more pupils each.

Table 8 presents certain key financial items for school districts by enrollment-size groups and by educational grades provided, State-by-State, together with a count of school districts and enrollment as of October 1971.

One characteristic of the data in table 8 deserves particular attention. The classification of districts and the count of enrollment are based upon the number of pupils in operative schools, rather than upon the residential origin of pupils. Any district that does not operate schools is classed as having zero enrollment, and no pupils are counted for it, since any pupils it transfers to another district are included in the enrollment of that district. Therefore, the enrollment shown in table 8 for districts of less than 150 pupils probably understates, nationally and in some States, the number of pupils for which this group of districts makes financial provision (including pupils served by tuition and transportation arrangements). The opposite tendency in data shown for larger districts is of less consequence, since pupils they serve on a transferred-in basis represent only a very small fraction of their gross enrollment.

BEST COPY AVAILABLE

Omitting school districts that enroll less than 150 pupils, for the reason just indicated, nationwide average per-pupil amounts for certain of the key financial items shown in table 8 are as follows:

Size of district (pupils enrolled)	Average 1971-72 amount per pupil				
	Total general revenue	Taxes	Inter-governmental revenue	Total general expenditure	Total debt
3,000 or more...	$1,008	$494	$450	$1,005	$650
1,200 to 2,999..	985	443	470	978	668
600 to 1,199....	1,008	470	461	1,000	656
300 to 599.....	1,009	497	436	974	563
150 to 299.....	1,134	613	441	1,095	479

INDIVIDUAL DISTRICT DATA

Summary financial amounts appear in table 9 for school districts that reported an enrollment of 3,000 or more pupils in October 1971.

These figures generally correspond in nature and definition to financial data appearing in other tables, except that they are inclusive of interdistrict transactions. Thus, "Intergovernmental revenue," as shown in table 9, includes any reported receipts from other districts for pupil tuition and transportation, and "Other current expenditure" includes, without deduction, any amounts paid to other school districts.

For two States, there is another difference of classification between the revenue amounts shown for individual districts in table 9 and statewide aggregates appearing in tables 3 to 8. The State governments of Louisiana and Wisconsin distribute, to their local governments, sums to offset the effect of partial exemptions from property taxation that are provided for by statute. Such amounts are received by school districts along with their property taxes, and are so reported here in table 9. For tables 3 to 7 however, reference to official records of these States has made it possible to exclude these distributive amounts from "Property taxes" and include them under "Intergovernmental revenue from the State."

Another difference in reporting individual district amounts occurs in Pennsylvania where it was necessary to report financial data for regular schools and three "joint schools." These so called "joint schools" share in the financing of schools it provides in lieu of, or in addition to, operating their own school facilities.[4]

SOURCES OF DATA AND SURVEY PROCEDURE

The financial statistics reported here are based mainly on information received in response to a mail canvass covering all school districts in the United States. School districts had been identified and their pupil enrollment as of October 1971 had been ascertained previously, as described in Governmental Organization (1972 Census of Governments, Vol. 1).

Usable reports on finances were received by mail from more than 90 percent of all the school districts canvassed. This response was further supplemented by visits or mail inquiries to obtain data concerning significant missing units from State education offices. The reports thus assembled were checked for evidence of completeness, internal consistency, and reasonableness. Followup correspondence was used in many instances to obtain additional figures or a confirmation or correction of amounts first reported. For some school districts--practically all of them very small--it was necessary to estimate financial amounts by reference to figures reported by other districts of corresponding enrollment size.

The figures thus assembled were added to arrive at the National, State-by-State, and size-group aggregates presented in this report.

RELIABILITY AND LIMITATIONS OF DATA

Errors of response and data handling. The procedures applied for the 1972 Census of Governments were designed to achieve, for the data reported here, a high standard of completeness and accuracy. The census questionnaire included explicit definitions. For school districts in numerous States, the standard financial questionnaire was accompanied by additional instructions as to the treatment of unusual items, and such instructions were also used as a guide to subsequent examination of questionnaires in the Bureau of the Census. Undoubtedly, however, some mistakes or inconsistencies of official reporting, or of Census Bureau handling of particular amounts, have escaped detection.

Coverage limitations. The statistics in this report, it may be emphasized, do not comprise all public school finances in the United States, but relate only to the finances of independent school districts. Nationally, as in most States, such units account for a major portion of all public school operations, but there are significant departures and exceptions. The most important of these concern States where independent school districts do not account for all or substantially all public school enrollment. The following tabulation identifies these States, and shows the percent of all their public school pupils who were enrolled, as of October 1971, in "dependent" school systems rather than independent school districts:

State	Percent	State	Percent
Alaska..............	100	New Hampshire.....	32
Connecticut.........	97	New Jersey........	29
Delaware............	11	New York..........	41
District of Columbia	100	North Carolina....	100
Hawaii..............	100	Rhode Island......	98
Maine...............	58	Tennessee.........	98
Maryland............	100	Virginia..........	100
Massachusetts.......	94	Wisconsin.........	30

---

[4] Transactions between regular school districts and these "joint schools" has been netted out in arriving at State aggregates, as is done generally for interdistrict amounts.

These are the States omitted from the tabulation on page 4 concerning "school districts in 35 selected States."[5]

Relation to 1967 Census data. To a considerable degree, the statistics presented here are closely parallel in concepts, coverage, and classification to the data on school district finances that were issued in the corresponding report (vol. IV, No. 1) of the 1967 Census of Governments. However, efforts at detailed comparative use of the two sets of figures may need to take account of intervening changes in school district organization--which in some States have been extensive.

GEOGRAPHIC REGIONS

The States included in each of the regions are as follows:

NORTHEAST

Connecticut
Maine
Massachusetts
New Hampshire
New Jersey
New York
Pennsylvania
Rhode Island
Vermont

NORTH CENTRAL

Illinois
Indiana
Iowa
Kansas
Michigan
Minnesota
Missouri
Nebraska
North Dakota
Ohio
South Dakota
Wisconsin

SOUTH

Oklahoma
South Carolina
Tennessee
Texas
Virginia
West Virginia

WEST

Alaska
Arizona
California
Colorado
Hawaii
Idaho
Montana
Nevada
New Mexico
Oregon
Utah
Washington
Wyoming

---

[5] On the other hand, the tabulation on page 4 does include a number of States which have minor numbers of public school students enrolled in "dependent" school systems--i.e., Arizona, California, Indiana, Minnesota, North Dakota, Ohio, and Texas--as well as Pennsylvania, where the "dependent" school systems are related to groups of independent school districts rather than being adjuncts of other kinds of governments.

Note: Because of rounding, detail may not add to total.

- Represents zero or rounds to zero.

[1] To avoid duplication, interschool district transactions are excluded.

[2] Including intergovernmental expenditure as follows (in millions): United States, $255; Indiana, $47, Pennsylvania, $208. See text.

Note: Because of rounding, detail may not add to total.

- Represents zero or rounds to zero.

[1] Amounts shown here have been reported as issued specifically for provision of higher education facilities, and do not represent all borrowing used for this purpose. Many issues of debt by school districts which provide elementary and secondary as well as higher education are not recorded to show distinctively amounts for various grade levels.

Table 7. Cash and Security Holdings of School Districts, by States: 1971-72

(Thousands of dollars) BEST COPY AVAILABLE

Area	Total	By purpose of holding				Other than employee-retirement holdings, by type					
		Employee retirement	Offsets to debt	Bond funds	Other and unallocable	Total	Cash and deposits	Securities

Note: Because of rounding, detail may not add to totals. Amounts shown here for districts enrolling less than 50 pupils and for districts providing elementary grades only may include minor amounts for nonoperating districts. See table 2 for summary financial data for nonoperating districts.

- Represents zero or rounds to zero.
X Not applicable.
Z Less than half the unit of measurement shown.

[1] United States totals pertain to all school districts, by size class (inclusive of the "joint schools" of Pennsylvania). However, individual State detail is shown here only for the 40 States where school districts (rather than school systems operating as adjuncts of other governments) account for all or a major portion of all public school enrollment, and are numerous enough to justify size classification.

[2] Excluding transactions between school districts, to avoid duplication; however, any amounts of revenue received from other types of local governments are included.

[3] Excluding transactions between school districts, to avoid duplication.

[4] This State also has one or more school systems operated by other governments, rather than school districts; no amounts are included for such "dependent" school systems.

[5] Per capita amounts do not appear for districts enrolling less than 50 pupils because of the potential effect upon such data of interdistrict relationships; see text.

[1] Any amounts of interschool district transactions are included here, rather than excluded as in other tables.

Definitions of Selected Terms

Major categories for the Census Bureau's classification of governmental finances, as applicable to school districts, are defined below. Additional explanations and background information are provided in the introductory text.

Bond Funds. Funds established to account for the proceeds of bond issues pending their disbursement.

Borrowing. Long-term debt incurred, other than to refund existing long-term debt, plus any net increase in short-term debt outstanding.

Capital Outlay. Direct expenditure for contract or force account construction of buildings, roads, and other improvements, and for purchases of equipment, land, and existing structures. Includes amounts for additions, replacements, and major alterations to fixed works and structures. However, expenditure for repairs to such works and structures is classified as current operation expenditure.

Cash and Security Holdings. Cash, deposits, and governmental and private securities (bonds, notes, stocks, mortgages, etc.), except holdings of agency and private trust funds. Does not include interfund loans, receivables, and the value of real property and other fixed assets.

City-Operated Schools. See Education.

Construction. Production of fixed works and structures and additions, replacements, and major alterations thereto, including planning and design of specific projects, site improvements and provision of equipment and facilities that are integral parts of a structure. Includes both contract and force account construction.

Current Charges. Amounts received from the public for performance of specific services benefiting the person charged and from sales of commodities and services. Includes fees, assessments, and other reimbursements for current services, rents and sales derived from commodities or services furnished incident to the performance of particular functions, gross income of commercial activities, and the like. Excludes amounts received from other governments (see Intergovernmental Revenue) and interdepartmental charges and transfers.

Current Operation. Direct expenditure for compensation of own officers and employees and for supplies, materials, and contractual services except amounts for capital outlay.

Debt. All long-term credit obligations of school districts whether backed by the school district's full faith and credit or nonguaranteed, and all interest-bearing short-term credit obligations. Includes judgments, mortgages, and revenue bonds, as well as general obligation bonds, notes, and interest-bearing warrants. Excludes noninterest-bearing short-term obligations, interfund obligations, amounts owed in a trust or agency capacity, advances and contingent loans from other governments, and rights of individuals to benefits from school district employee retirement funds.

Debt Issued. See Long-Term Debt Issued.

Debt Offsets. See Long-Term Debt Offsets.

Debt Outstanding. All debt obligations remaining unpaid on the date specified.

Debt Retired. See Long-Term Debt Retired.

Dependent School District. A school district which lacks sufficient autonomy to be classified as an independent governmental unit and is treated as a dependent agency of some other government--a county, municipality, town or township, the State government, or (in the case of Pennsylvania "joint schools") a group of school district governments.

Direct Expenditure. Payments to employees, suppliers, contractors, beneficiaries, and other final recipients of government payments--i.e., all expenditure other than Intergovernmental Expenditure.

Education. Schools and other educational facilities and services. Local Schools includes mainly city-operated elementary and secondary schools and other educational institutions (other than higher education), and intergovernmental expenditure for education, payments to private institutions, and special educational programs. City-operated local school expenditure includes administration and supervision of the school system and related school-administered facilities and services, such as public transportation, school health and recreational programs, school lunch programs, and school libraries. Revenue and expenditure for school lunch services, athletic events, and other commercial or auxiliary services are generally reported on a gross basis. Institutions of Higher Education comprise universities, colleges, and junior colleges operated by the city.

Employee-Retirement Expenditure. Cash payment to beneficiaries (including withdrawals of contributions) of employee retirement systems. Excludes cost of administering retirement systems, school district contributions to State-administered employee retirement systems, and noncontributory gratuities paid to former employees.

Employee-Retirement Revenue. Revenue from retirement contributions received from employees and other governmental or private employers, and earnings on investment assets set aside to provide income for retirement system purposes. Excludes contributions from the employing school district (which are intragovernmental transfers).

Equipment. Apparatus, furnishings, motor vehicles, office machines, and the like, having an expected life of more than 5 years. Equipment expenditure consists only of amounts for purchase of equipment. Rental and repair expenditures are classified as current operation expenditure. Expenditures for facilities that are integral parts of structures are classified as expenditure for construction or for purchase of land and existing structures.

BEST COPY AVAILABLE

Expenditure. All amounts of money paid out by a government—net of recoveries and other correcting transactions—other than for retirement of debt, purchase of securities, extension of loans, and agency transactions. Note that expenditure includes only external transactions of a government and excludes noncash transactions such as the provision of perquisites or other payments in kind.

Fiscal Year. The 12-month period at the end of which the school district determines its financial condition and the results of its operations and closes its books.

Full Faith and Credit Debt. Long-term debt for which the credit of the school district, implying the power of taxation, is unconditionally pledged. Includes debt payable initially from specific taxes or nontax sources, but representing a liability payable from any other available resources if the pledged sources are insufficient.

General Debt. All debt other than that identified as having been issued specifically for utility purposes.

General Expenditure. All school district expenditure other than those classified as employee-retirement or other insurance trust expenditure.

General Revenue. All school district revenue except employee-retirement or other insurance trust revenue.

Independent School Districts. Those districts that are administratively and fiscally independent of other governments and exist for the purpose of providing public school education.

Interest Earnings. Interest earned on deposits and securities including amounts for accrued interest on investment securities sold. However, receipts for accrued interest on bonds issued are classified as offsets to interest expenditure. Note that interest earnings shown under general revenue do not include earnings on assets of employee-retirement systems.

Interest Expenditure. Amounts paid for use of borrowed money.

Intergovernmental Expenditure. Amounts paid to other governments as fiscal aid in the form of shared revenues and grants-in-aid, as reimbursements for performance of general government activities and for specific services for the paying government, or in lieu of taxes. Excludes amounts paid to other governments for purchase of commodities, property, or utility services, any tax imposed and paid as such, and employer contributions for social insurance--e.g., contributions to the Federal Government for old-age, survivors', disability, and health insurance for school district employees.

Intergovernmental Revenue. Amounts received from other governments as fiscal aid in the form of shared revenues and grants-in-aid, as reimbursements for performance of general government functions and specific services for the paying government, or in lieu of taxes. Excludes amounts received from other governments for sale of property and commodities. All intergovernmental revenue is classified as general revenue.

Intergovernmental Revenue From Federal Government. Intergovernmental revenue received by the school district directly from the Federal Government. Excludes Federal aid channeled through State governments.

Intergovernmental Revenue From State Government. All intergovernmental revenue received from the State government, including amounts originally from the Federal Government but channeled through the State.

Land and Existing Structures. Purchase of these assets as such, purchase of rights-of-way, and title search and similar activity associated with the purchase transactions.

Local Schools. See Education.

Long-Term Debt. Debt payable more than 1 year after date of issue.

Long-Term Debt Issued. The par value of long-term debt obligations incurred during the fiscal period concerned, including funding and refunding obligations. Debt obligations authorized but not actually incurred during the fiscal period are not included.

Long-Term Debt Offsets. Cash and investment assets of sinking funds and other reserve funds, however designated, which are specifically held for redemption of long-term debt, including bond reserve funds, deposits with fiscal agents for the redemption of uncanceled debt, and balances in refunding bond accounts held pending completion of refunding transactions.

Long-Term Debt Retired. The par value of long-term debt obligations liquidated by repayment or exchange, including debt retired by refunding operations.

Net Long-Term Debt. Long-term debt outstanding minus long-term debt offsets.

Personal Services. Amounts paid for compensation of school district officers and employees. Consists of gross compensation before deductions for withheld taxes, retirement contributions, or other purposes.

Property Taxes. Taxes conditioned on ownership of property and measured by its value. Includes general property taxes relating to property as a whole, real and personal, tangible or intangible, whether taxed at a single rate or at classified rates, and taxes on selected types of property, such as motor vehicles or certain or all intangibles.

Revenue. All amounts of money received by a school district from external sources--net of refunds and other correcting transactions--other than from issuance of debt, liquidation of investments, or as agency and private trust transactions. Note that revenue excludes noncash transactions such as receipt of services, commodities, or other "receipts in kind."

Sales and Gross Receipts Taxes. Taxes, including "licenses" at more than nominal rates, based on volume or value of transfers of goods or services, upon gross receipts therefrom, or upon gross income, and related taxes based upon use, storage, production (other than severance of natural resources), importation, or consumption of goods. Dealer discounts or "commissions" allowed to merchants for collection of taxes from consumers are excluded.

BEST COPY AVAILABLE

Sale of Property. Sale of real property and improvements. Excludes sale of securities, commodities, equipment, and other personal property.

Securities. Stocks and bonds, notes, mortgages, and other formal evidences of indebtedness.

Short-Term Debt. Interest-bearing debt payable within 1 year from date of issue, such as bond anticipation notes, bank loans, and tax anticipation notes and warrants. Includes obligations having no fixed maturity date if payable from a tax levied for collection in the year of their issuance.

Taxes. Compulsory contributions exacted by a school district for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classified as insurance trust revenue. All tax revenue is classified as general revenue and comprises amounts received (including interest and penalties but excluding protested amounts and refunds) from all taxes imposed by a government. Note that school district tax revenue excludes any amounts from shares of State-imposed-and-collected taxes, which are classified as intergovernmental revenue.

1972 CENSUS OF GOVERNMENTS PUBLICATION PROGRAM

BEST COPY AVAILABLE

The results of the 1972 Census of Governments are being issued in eight volumes of paperbound reports. A brief description of each report is listed below. As each report becomes available, an order form will be issued. More detailed information can be obtained by writing to the Publications Distribution Section, Social and Economic Statistics Administration, Washington, D.C. 20233.

Volume 1.

GOVERNMENTAL ORGANIZATION

This volume provides data nationally, by States, and for standard metropolitan statistical areas on county, municipal, and township governments by size classes; on school districts and other public school systems by size of enrollment, by kind of area served, by grades provided, and by number of schools operated; and on special districts by function performed. Also shown is the number of local governments, by type, in each county in the Nation. The volume also includes a summary description of governmental structure in each State.

Volume 2.

TAXABLE PROPERTY VALUES AND ASSESSMENT-SALES PRICE RATIOS

Part 1. Taxable and Other Property Values--Part 1 contains amounts of assessed value (gross and net) officially determined in 1971 for local general property taxation, for counties and for each city having a 1970 population of 50,000 or more, with totals for States and their SMSA and non-SMSA components. Results for the latter jurisdiction are compared, on a total and per capita basis, with corresponding data for 1961. For a group of large assessing jurisdictions, part 1 also includes estimates of locally assessed realty distributed among major use categories. Values reported as applicable to totally exempt property are shown for a limited number of States.

Part 2. Assessment-Sales Price Ratios and Tax Rates--Part 2 provides statistics, based on a sampling within more than 2,000 local assessing jurisdictions throughout the United States, on real properties involved in measurable sales during a 6-month period of 1971. Statistics include effective tax rates, assessment-sales price ratios, and dispersion coefficients applicable to single-family (nonfarm) houses and certain other realty, for States, local assessing jurisdictions classified by type, and selected local areas, each having a 1970 population of 50,000 or more. In addition, part 2 contains a summary of special property taxes of State and local governments for 1971-72.

Volume 3.

PUBLIC EMPLOYMENT

This volume consists of three separate paperbound reports on public employment.

No. 1. Employment of Major Local Governments--Statistics on October 1972 employment and payrolls of individual major local governments. Data are presented individually for all county governments, municipalities, and selected townships of 10,000 population or more, school districts with 3,000 or more enrollment, and special districts with 100 or more full-time employees. Data reported includes total, full-time, and full-time equivalent employment as well as payrolls and average monthly earnings. Full-time equivalent employment of counties and municipalities is shown for selected functions.

No. 2. Compendium of Public Employment--National data on October 1972 government employment and payrolls (including Federal Government), by function, and by type of government. State-by-State statistics are provided for all levels of government and, for State and local governments, are shown by governmental function. Additionally, statistics are presented by county areas for local governments; by population size groups for counties, municipalities, and townships; by enrollment size groups for school districts; and by employment size groups for special districts. Data are presented by level of government and type of local government for State and local government full-time employees covered by contributory retirement systems; health, hospital or disability insurance and life insurance.

No. 3. Management-Labor Relations in State and Local Governments--National and State-by-State statistics on the number of full-time State and local employees who belong to an employee organization, type of labor relations policy practiced by State and local governments, number of written labor-management agreements and number of work stoppages in State and local governments, by level of government and type of local government. Data on organized full-time employees and work stoppages are also shown for selected functions of State and local government. Statistics on work stoppages include number of employees involved, workdays and mandays idle, major issues involved, and final methods of resolution.

Volume 4.

GOVERNMENTAL FINANCES

This volume consists of five separate paperbound reports on government finances.

No. 1. Finances of School Districts--Statistics on revenue, expenditure, debt, and financial assets of school districts for their fiscal years 1971-72. Figures are shown in detail for each State and, as to selected financial items, for enrollment-size groups of school districts and individual school districts enrolling 3,000 or more pupils.

No. 2. Finances of Special Districts--Data for fiscal 1971-72 on finances of special districts, by State, and for selected large districts.

No. 3. Finances of County Governments--Statistics for the United States and for each State on revenue, expenditure, debt, and financial assets of county governments. Selected financial items are shown for groups of counties, classified by size of population, and for individual county governments.

No. 4. Finances of Municipalities and Township Governments--Data on revenue, expenditure, debt, and financial assets of municipalities and townships for their 1971-72 fiscal years. Detailed statistics are given for States. Selected financial items are reported for population-size groups of these governments, and for individual municipalities and townships having 10,000 or more inhabitants.

No. 5. Compendium of Government Finances--A comprehensive summary of the census findings on governmental finances for fiscal 1971-72 showing data for the Federal Government, individual States, and local governments by type of government, and data for State and local governments by States, including a breakdown by type of government. Figures are given separately for local governments within standard metropolitan statistical areas and for county areas. Also shown are per capita figures, percentage distributions, and State rankings.

Volume 5.

LOCAL GOVERNMENT IN METROPOLITAN AREAS

This volume presents the census findings for standard metropolitan statistical areas (SMSA's) in three major subject fields: Numbers of local governments by type and size, local government employment, and local government finances. Data are shown in terms of nationwide aggregates, for population-size groups of SMSA's and for the SMSA portion of each State, as well as for individual SMSA's and their component counties. Data are also shown for selected items of direct State expenditure in these areas.

Volume 6.

TOPICAL STUDIES

This volume consists of five separate paperbound reports on selected subjects.

No. 1. Employee-Retirement Systems of State and Local Governments --Membership, receipts, expenditures, number of beneficiaries and financial assets are presented for State and local government employee-retirement systems. Also shown are national and State totals by membership size and coverage class of system, and individual-system data for those retirement systems with 200 or more members.

No. 2. State Reports on State and Local Government Finances --Concise descriptive listings, by State, of periodic State government publications that contain statistics on State and local government finances.

No. 3. State Payments to Local Governments --Programs for financial grants and reimbursements to local governments in each State are described, indicating the basis of allocation and amounts paid under each program during the fiscal year 1971-72. Statistics are also presented on State intergovernmental expenditure, by function and by type of recipient government, together with comparative historical data.

No. 4. Historical Statistics on Governmental Finances and Employment --Nationwide figures on governmental revenue, expenditure, and indebtedness, by Federal, State, and local levels of government, for selected years (1902, 1913, 1922, 1927, 1932, biennially from 1936 to 1966, and annually from 1967 to 1972). Nationwide figures on public employment are presented for the period since 1940. State-by-State data on the finances of State and local governments appear for selected years since 1957, and on employment for 1953, 1957, 1962, 1967, and 1972.

No. 5. Graphic Summary --Charts and maps first issued in other reports of the census are assembled here with a brief explanatory text and a reference guide to the subject matter reports where the underlying statistics appear.

Volume 7.

STATE REPORTS

This volume will be a series of 52 publications each of which presents, for a particular State, the principal findings of the census concerning governmental structure and numbers, public employment, and State and local government finances. Each report includes several charts which show key measures of finances and employment, State by State.

Volume 8.

GUIDE TO 1972 CENSUS OF GOVERNMENTS

This report presents detailed samples of tables published in the 1972 Census of Governments report series. It is a descriptive information source for users and potential users of data produced during the Census of Governments.
